

# Fertigation Mix Tanks

Fertec's Fertigation Mix Tanks are specifically designed for ease of use on farm and are suitable in a wide range of fertigation types. When paired with a dosing pump, Entra Micronised Gypsum is able to be mixed as a slurry, injected into the irrigation mainline where it then dissolves completely throughout the irrigation system.

## Fertigation Made Simple

- Small bag loading grate
- Can mix soluble fertilisers
- Can mix Entra Micronised Gypsum as a slurry
- Ground level filling height, no need for platforms

## Specifications

- 4,600L mix capacity
- Flat bottom sloping floor to 3" outlet
- Side or centre mounted agitator
- Full SS304 construction
- Relocatable with standard forks
- Transportable with no wide load
- Optional in tank heat exchanger
